

Extensive practical and theoretical experience meets best practice

## **Shutdown Assistance Services**

Take control of your vital asset shutdowns, by relying on Verantio's shutdown assistance services. Our range of services allows us to assist in all facets of your shutdown, whether it's a single storage tank, a multi-year program, or a larger outage of tank pits and their infrastructure. Allow us to apply our know-how, tools, and experience to assist you in optimizing the goals for your projects; such as time, cost, and predictability.

Our team of experts is here to optimise your next shutdown.

Verantio offers a wide range of services for your shutdown and turnaround needs. We optimize your asset assessment by applying the right inspection scope and tools for the job. We use our extensive experience to ensure you get the data you need – no more, no less.

We can set-up or optimize your shutdown processes by implementing the best of

the industry practices, and look to create lean, effective, and predictable shutdowns.

Our experts are also available to fulfil vital roles in your shutdown projects, whether you're looking for a key player in a larger project team, or a multifaceted lead role.
