

Preserving and increasing your knowledge by Best Practice Exchange

# Training

The Verantio Group work closely with 2KG Training, who facilitates the training, partnering with leading experts, to provide professional development training courses for Managers, Engineers, Operators, Inspectors and Technicians.

The courses are a combination of theory and practical instruction, presented by experts in the field with years of industry experience and tailored to your needs. The primary focus of the training is to bring the latest standards and techniques in storage tanks, boilers, pressures vessels, piping, tank gauging, tank program, as well highlighting problem areas.

The courses are also available via webstreaming.

Upon client request, the courses can also be held in-house, allowing various staff members to attend class between shift changeovers.

**Verantio and 2KG Training offer courses in the following categories:**

- API
- ASME
- BEARINGS
- COMPRESSORS
- ELECTRICITY
- GAS TURBINES
- INDUSTRIAL FLOW
- MECHANICAL SEALS
- PIPING SYSTEMS
- PUMPS
- RELIABILITY
- VALVES
